

HazMat Medic Course

Monday, July 13, 2020 (8:30 am - 5 pm)

The National Fire Protection Association recommends all ALS EMS personnel at a hazardous materials incident shall be trained to meet at least the competencies of the operations level responder in NFPA 472 and chapter five of NFPA 473. This course address many of those requirements found in NFPA 473.

The goal of this course is to provide the ALS-certified individual with the knowledge and skills necessary to safely deliver ALS at hazardous materials / weapons of mass destruction incidents. Topics include:

- Analyzing a hazardous materials incident to determine the potential health risks to the ALS provider, other responders, and anticipated patients.
- Identifying chemical and physical properties that can affect patient exposure outcome, and
- Developing and implementing a pre-hospital treatment plan for exposed patients based on multiple toxidromes.

This course is provided by Emergency Operational Solutions. The lead instructor is Michael Schultz who is a firefighter, hazmat technician, paramedic, and instructor with over 20 years of experience as a hazmat medic. Visit eosolutions.us for more information.

There are no pre-requisites to attend this course, however, the most benefit will be obtained by students with ALS-level licensure and having completed a Hazmat Incident Response - Operations course.

Application fee of \$10 is required to hold your spot in class. Tuition of \$40 is due the day of class. Follow the link at the bottom of this page and complete an online application.

All courses require completion of a registration application.

All course locations are CMH EMS Headquarters (1525 N Oakland, Bolivar, MO) unless otherwise specified.
