

Documentation Competency

June 2022

Documentation is an essential element of being a good healthcare provider. The Summer 2022 Competency focuses on improving documenting patient encounters and care.

Steps each CMH PHS staff member needs to take:

1. Sign up for one of the time slots below.
2. Review the following documents prior to attending. All documents can be found on <https://emsprotocols.online/cmhems>
 - a. CMH Policy PHS01-04 (Documentation Requirements)
 - b. CMH Policy PHS01-15 (Electronic Patient Care Report Usage)
 - c. CMH PHS Guideline 1-700-33 (Patient Care Documentation)
3. Attend the time slot you signed up for. At the competency, there will be multiple stations staffed by Crew Leaders where you will watch a video and document in ESO as you would a real call. The Crew Leader will then perform a Documentation Review according to CMH PHS Guideline 1-450-33 (Documentation Reviews). Real-time feedback will be provided along with a rating of your documentation. A passing score of "Good" is required for all stations.
