All the smart people at CMH are agreeing we should be seeing an increase of patients over the next ten days and see our peak around 10-14 days. It seems in just the past 24 hours, we are already feeling it with call volume and severity today.

Stay vigilant. Wear your N95 as much as possible and do not hesitate to upgrade to your respirator.

We know we have a critical need for respirator adapters, but Bob and I are working on a solution that isn't waiting 12 weeks for our order to come in. I'll let you know tomorrow how our prototype works.
