Subject: weekly external EMS status update

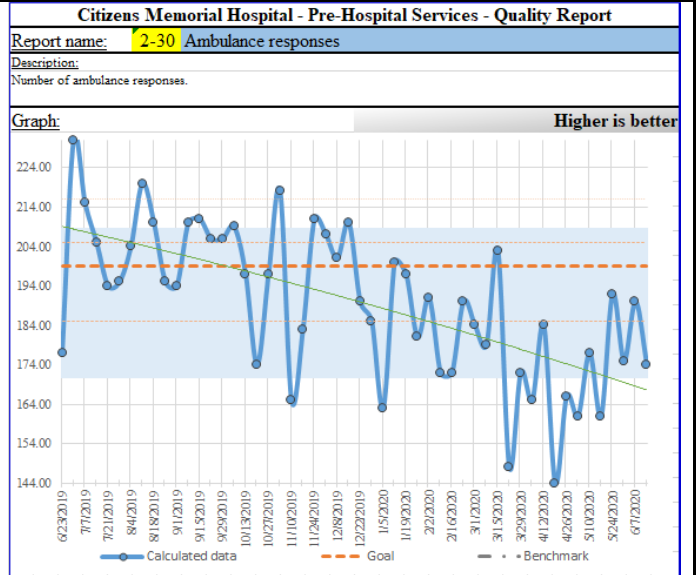

Here's the data you have all grown to love:

US and Missouri COVID new cases. We are just watching this to see how the recovery and openings affect disease spread. Slight uptick in the US and moderate uptick in cases in Missouri.

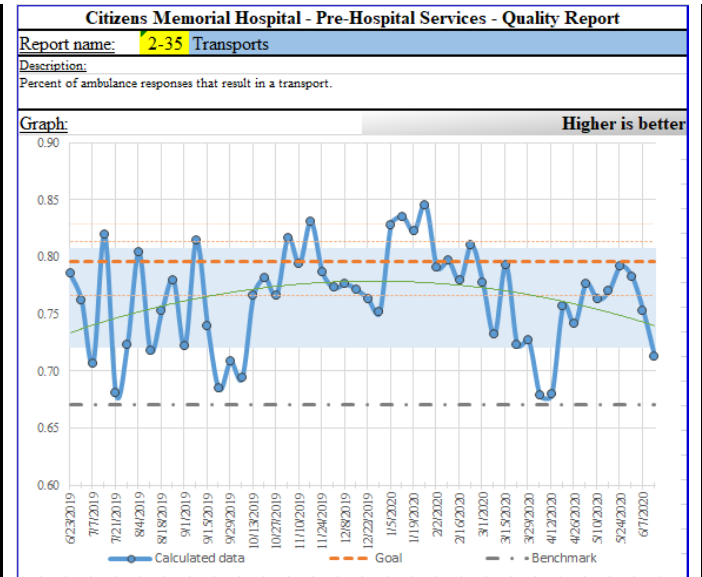

Call volume in the last four weeks is **93%** of what it was before 3/15/20.

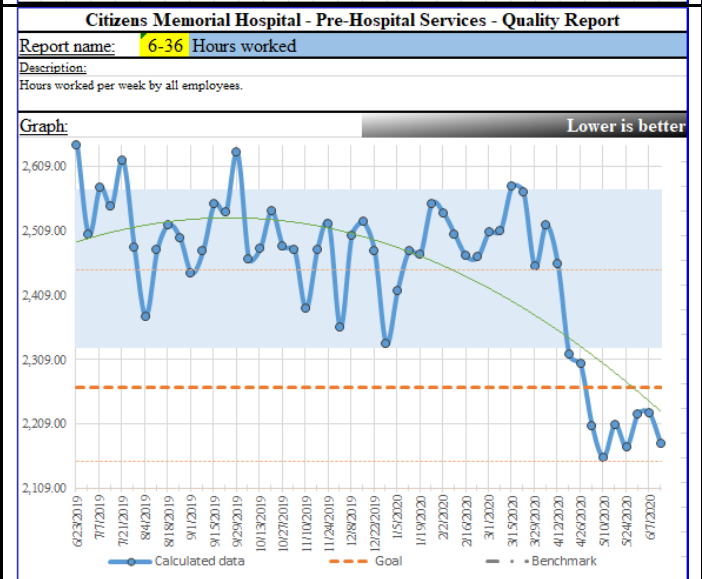

The current goal to return to 12-hour shifts in Bolivar is above 185 calls for three weeks in a row, service-wide. We missed it last week, so our counter is reset.

Transport volume in the last four weeks is **92%** of what it was before 3/15/20.

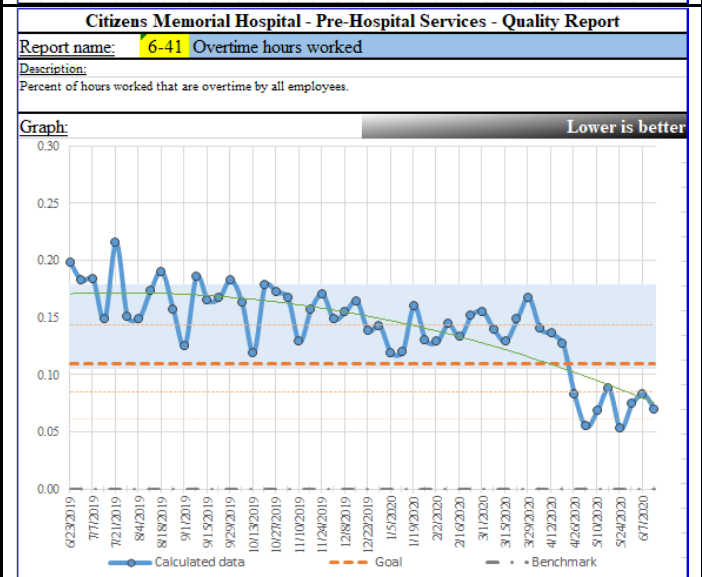

In the last four weeks, we are at **88%** of what we were before 4/19/20.

In the past four weeks, we are at **40%** of the amount of overtime we had before 4/19/20.

The goal is to remain below 11%. In the last four weeks, we averaged **7%**.
