

January 18, 2021

Weekly update from Meetings

Documentation reminders: If the patient is ill (includes weakness}, injured (includes a fall where they are still on the ground), or at any point requested an ambulance, **you must obtain a PRC.** If you make patient contact, you must obtain a billing authorization signature.

Charts must be completed by end of shift unless you have permission from a leader to extend to 24 hours.

We are going to set the list of FTOs at the end of January for the entire calendar year. The list will be updated again next January.

We are moving forward with ordering parts to add dual oxygen to ambulances. Two ambulances per month until they are all done.

Please complete the survey to share your opinion on what the priorities should be for capital budget requests.

We are trialing an iPad in the front of an ambulance to be used for *TangoTango*, *Freedom*, and a second device to do EHR reports on.

Please sign up to get on the list to get your COVID vaccine if you haven't got it already. It's safe and protects your community, patients, coworkers, and family.

We are watching intelligence reports for possible violence next week and will adjust transfer patterns if we need to.

Managers are working on hiring more PRN staff now that all full time are filled.

We have driven 14,000 miles in the last seven days and only two of them have been speeding.

Now that we have vent circuits for the O-Two, we will order BiPAP circuits for them.

Protocol committee is meeting **Jan 27.**

Equipment committee is meeting is **Feb 24.**

Possible group violence this week!

With the upcoming inauguration this week, there are many reports that protests will be held with some possibly becoming violent.

- Keep your head on a swivel. (Be observant of your surroundings.)
- Watch your partners back.

If something doesn't "feel" right or look right then it probably isn't right.

Ultimately, we all want to go home to our loved ones. Please be cautious!

EMS Station Housekeeping Issues

Linen cans are to be changed when ¾ full. As you see here, linen was pushed down so the lid would cover it and appear to not be full. Sadly, the linen cart is right next to the linen can!!

Do your chores and don't be LAZY!!!

Slip hazard!!!

PLEASE turn off the water and drain the hose when rolling up the hose. Leave the nozzle in the floor drain so this doesn't happen! The water was in the linen room before we found it!

If you go out the front door at the POLK station after dark, MAKE SURE YOU LOCK THE DOOR!! On multiple occasions, this door has been found unlocked when crews return to quarters.

Upcoming Events

Driver Stats

DAILY SHIFT HUDDLE 845am daily

- CMH Paramedic Class:
- Medical Terminology Jan 18th
 - Life Support Competency Jan 19th
 - Polk Co. A Week Staff Meeting Jan 19th
- CMH Paramedic Class:
- Pharmacology Pt. 1 Jan 21st
