Wednesday, February 24th ▾

Notes from this week's meetings:

- The new O2 ventilators have been delivered to the Bolivar station today after being approved by BioMed. Tomorrow, we will put them together with the bags, etc. and start getting them out to stations.
- Yak Trak shoe grippers have been added to the Galls options.
- Still working on getting new ambulance bids.
- Finishing up interviews and hiring for open positions. Expect some new hires through orientation in the next few weeks and some folks moving stations.
- Still working on moving from King/LMAs to I-Gels
- Some medication shortages (ASA and Epi 1:10k).
